

VEHICLE SECURITY

MotorOne Universal Upgrade Alarm

If your vehicle has a factory fitted remote locking system, you can convert it into a full alarm system with the MotorOne Universal Upgrade Alarm.

Your existing transmitter will lock and unlock the car as normal and will simultaneously control the MotorOne Universal Upgrade Alarm system.

Each time the alarm system is turned on, your vehicle will be monitored by the MotorOne Universal Upgrade Alarm sensing systems and any unauthorised interference will be detected (depending on the sensors fitted).
